To whom it may concern

I am happy to provide this letter of recommendation to **Fatemeh Marzoughi**.

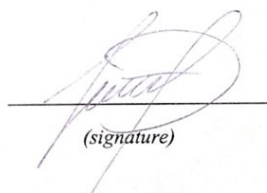

Fatemeh worked as a Front-end developer with Comfortel and was my direct report. During her 6 months here, Saba was primary responsible for building complex user interfaces and applications logic using a variety of technologies, she proved herself to be a dependable and self-learning employee and a hard worker with solid problem solving and technical skills.

She demonstrated very strong knowledge of development principles, a reverent attitude to the code and testing, the ability to document them qualitatively.

I must point that Saba has never missed deadlines and was very punctual in every aspect of work. She is a talented and fast-learning employee, and I am sad to see her leave. I am confident that she will be an asset to your organization and I strongly recommend her for mid-level development position.
