About me

I'm a front-end developer with 2 years of full-time experience and 3 years of self-studying in this field. I have started my journey in programming since my entrance to the university. I have experience working with design patterns, OOP, functional programming, REST-API, React, React-Native on both iOS and Android, electron on Mac and Windows operating systems, etc. Now I'm looking forward a position in which I can increase my experience in developing mobile applications (esp. React-Native) and my Software engineering skills.

Education

(Sep 2017– Dec 2021)

Diploma: Bachelor of Computer Engineering (Software)

University: Islamic Azad University, Tehran-Central branch

Skills

React, React Native, iOS, Android, Git, Electron for desktop apps (Windows and Mac OS), TestFlight, Local Storage, Native-Base, Jest, HTML 5, CSS 3, SASS, web design, JavaScript, Strapi CMS, TypeScript, Redux, Agile/Scrum team, REST-API, APIs, Design, Postman, patterns, functional and class-based React components, OOP, Collaborative environment, Mobile development, code review, Problem solving, GraphQL

Fatemeh (Saba) Marzoughi

Front-end Developer

React & React-Native

Work Experiences

- **UniPlato:** Mid-Level Front-End Developer

  Australia (Remote),   Aug 2022 – May 2023,   Visit Project

  - Brought the "Coffee" platform to its next level by building its desktop **Mac Application** using **Electron** and released over 20 versions of the app to **TestFlight**.
  - Increased the usability of the code by building over 15 pixel-perfect, responsive, and clean components.
  - Brought over 20 new features with demos to the platform by communicating with team members and using **REST-API**, **web sockets**, and working with both **functional** and **class-based components**.
  - Improved the stability of the platform by reviewing new team members' codes.
  - Upgraded the platform by refactoring the old code structures of 2 old modules and bringing them back to the project.

- **Comfortel:** Mid-Level Front-End Developer

  Russia (Remote),   Dec 2021 – May 2022,   Visit Project

  - Increased the usability of the "Techpal" platform by releasing its desktop app on 3 operating systems (**Windows**, **Mac,** and **Linux**) using **Electron** and its **Android** app using **React-Native**.
  - Refactored and added over 10 features to a flutter application named Smart Home.
  - Enhanced the team communication by customizing Mattermost platform both for desktop (Windows, Mac, and Linux) and mobile apps (Android).

- **Open Source and Freelancing:** Front-End Developer

  Tehran (Remote),   Apr 2020 – Dec 2021,   Visit Project

  - "MyPlayer" is an open-source **React-Native** project using **TypeScript**, available on both **iOS** and **Android** which is a Video and Audio player with over 20 features on it.
  - Improved the portfolio of Bytino startup team by working on 2 open-source projects and linking them to the team webpage.
