About me

I'm a Software Engineer with a passion for Frontend. I have been practicing for 5 years now, and I believe I'm ready for my next challenge where I can develop beautiful mobile applications and contribute to creation of a great software engineering team.

Skills

- HTML5, CSS3, SASS, JavaScript, TypeScript
- React
- React Native (Android, iOS)
- Electron (Windows, Mac OS)
- Rest API, GraphQL
- Redux, Context
- Native-Base, MUI
- Jest
- Realm, Hive
- Functional programming, OOP
- Strapi CMS, TestFlight
- Postman, Jira, Figma, Agile/Scrum team, Git

Education
(Sep 2017– Dec 2021)

Diploma: Bachelor of Computer Engineering (Software)

University: Islamic Azad University, Tehran-Central branch

Fatemeh (Saba) Marzoughi

Front-end Developer
React & React Native

Work Experiences

- **UniPlato:** Mid-Level Front-End Developer

  Australia (Remote),   Aug 2022 – May 2023,   Visit Project

  - Brought the "Coffee" platform to its next level by building its desktop **Mac Application** using **Electron** and released over 20 versions of the app to **TestFlight**.
  - Improved code base by building over 15 pixel-perfect, responsive, and clean **React** components which could be used by other team members in all the modules as our design system.
  - Brought over 20 new features with demos to the platform by communicating with team members and using **REST API**, **web sockets**, and working with both **functional** and **class-based components** using **React** Library.
  - Improved the stability of the platform by reviewing new team members' codes.
  - Upgraded the platform by refactoring the old code structures of 2 old modules and bringing them back to the project.

- **Comfortel:** Mid-Level Front-End Developer

  Russia (Remote),   Dec 2021 – May 2022,   Visit Project

  - Increased the usability of the "Techpal" platform by releasing its desktop app on 3 operating systems (**Windows**, **Mac,** and **Linux**) using **Electron** and its **Android** app using **React-Native**.
  - Enhanced the team communication by customizing Mattermost platform both for desktop (Windows, Mac, and Linux) and mobile apps (Android).
  - Had experience using Flutter.

- **Open Source** and **Freelancing:** Front-End Developer

  Tehran (Remote),   Apr 2020 – Dec 2021,   Visit Project

  - "MyPlayer" is an open-source **React Native** project using **TypeScript**, available on both **iOS** and **Android** which is a Video and Audio player with over 20 features on it.
  - Improved the portfolio of Bytino startup team by working on 2 open-source projects and linking them to the team webpage.
